A MONTHLY E-NEWSLETTER BY
JUANA TECHNOLOGIES

JANUARY 2020 • ISSUE 1 • VOLUME 2

HIGHLIGHTS

- **Trivia Today:** Your monthly dose of less known facts about technology!
- **The Top Five:** Among the schools enrolled with us under Microsoft Aspire School Program (MASP), the five most active schools on the Microsoft's platform are listed here! Congratulations to all the teams!
- **Showstopper's Message:** Where the school leader of the school on top of the list speaks!
- Microsoft Aspire School Program (MASP): Stories from the project
- **Microsoft Clubs**
- **Students Speak:** Stories and submissions from Microsoft Clubs (MASP)

Ms. Vimmi Jolly, Principal, Titiksha Public School

TRY THIS OUT!

Mark your notes with custom tags

Using tags in your notes is a great way to visually call out and categorize important notes for follow-up (for example, to track action items after a meeting).

To create your own custom tags, click the Tags menu dropdown on the Home tab (next to the text alignment buttons), and then click Create New Tag.

THE TOP FIVE

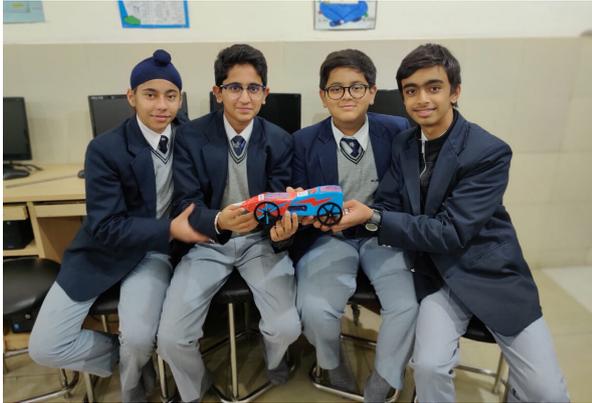

- Titiksha Public School
- STS World School
- Ajanta Public School
- ML Khanna DAV Public School
- Venkateshwar Global School

SHOWSTOPPER'S MESSAGE

Dear Readers

Once again, I am here to speak with you and I feel privileged to pen a few words of appreciation for my students, Titiksha Faculty and JuaNext. I congratulate all the contributors and the entire team of JuaNext for bringing out achievements of various schools. We, as a school, focus on the journey not the destination. We would continue to move forward and learn from the technology that Microsoft offers. When the team comes together and works in unison, with passion and commitment, the expected good results are bound to flow. Once again, congratulations to all who have made technology an integral feature in their teaching and learning process!

ASN: A SERIES OF ACHIEVEMENTS!

Team ASN Sr. Sec. School

ASN Senior Secondary School Class IX Students Madhav Khaneja, Eesha Saraswat, Girish Rajan and Chitwan Dutta participated in 6th Inter School Competition on 'Road Safety'. Madhav Khaneja and Eesha Saraswat won second prize in INNOVA POSTER - E-POSTER and Girish Rajan and Chitwan Dutta won third prize in KODU GAME - A - THON (VIDEO GAME) category.

E-poster created by Madhav Khaneja and Eesha Saraswat (ASN Sr. Sec. School) who won second prize in the INNOVA POSTER - E-POSTER

VIRTUAL FIELD TRIP: WALKING WITH DINOSAURS AT ASN

Team ASN Sr. Sec. School

Virtual Field trips are a great opportunity for students to take a break from the usual classroom setting, while being inspired to learn more. The students of primary wing of ASN Senior Secondary School attended a Virtual Field Trip - Walking with dinosaurs hosted by Ranjit Singh Disale through Skype, where students learned interesting facts about dinosaurs, explored their varied physical and behavioral adaptations, examine the interdependence of organisms with one another and their environment through this wonderful field trip. Hands-on displays helped the story of the giant prehistoric animals and their enthralling world millions of years ago. It was indeed an unforgettable trip.

IMPORTANT DATES

- 2 February to 8 February - International Development Week
- 4 February - World Cancer Day
- 13 February - Sarojini Naidu's Birth Anniversary
- 20 February - World Day of Social Justice
- 21 February - International Mother Language Day
- 28 February - National Science Day

HAS COMMUNICATION BECOME DIGITAL?

Gauri Wadhwa, XI B, Nishita Sharma, XI C, Titiksha Public School

American novelist, Tom Clancy, once quoted, "People live longer today than they ever have, they live happier lives, have more knowledge and information." All this is the result of communication technology, making human life simple and smooth. In modern parlance, digital communication has replaced the other sources of communication like letter writing is rapidly going obsolete. Being the netizen of a whole new technological and smart world, one cannot refuse that their fusion has made living easier. Prompt and accurate National and International news, weather forecast etc. are easily available to public, even one's financial credibility (CIBIL) status is available to the financial institutions to provide easy finance to business projects. Digital communication does not only social media but has completely revolutionised our globalised world. Some examples are- Emailing, texting, fax, tele-conferencing and video conferencing etc. Sharing information and communication is now possible with the snap of fingers or we can say with a single click of mouse. Since, human tendency is to complete one task and move on to other quickly, which is easier in this era. Let us not forget to incorporate the artificial intelligence as now it has reached our day-to-day life activities. In nutshell, let's contemplate, "Instead of using technology to automate processes, think about using technology to enhance human interaction."

Vinayak Dahiya, Vikas Bharati Public School

Technology is now the most important communication tool for organizations. Technology has transformed how organizations conduct public relations, including how they interact with the media and stakeholders. Communication technology can be a blessing and a curse for everyone. Communication is two-way - if you feel engaged, you feel listened to, and not just told. Anyone born before the advent of technology in their daily lives is considered a digital immigrant. Older generations invented our tech-enabled society, but the generations born in this millennium are the first true digital natives. Basically the everyday life of the present day generations has been greatly affected by the advent of digitalization over communication. This has led to a break in the inter-personal relationships in daily lives. Coming to an end communication has become digital and more advanced than ever. This can be taken both as good as bad.

MICROSOFT CLUBS

Team Rayat International School (Jayant Banati, Harshit, Vanshdeep and Tanisha - Class IX)

From the starting of human evolution till now, humans are very fond of communicating with each other. They find different ways to communicate which have changed a lot till now. In the past, people sent letters, postcards, etc. to their families to communicate with them, but now letters and postcards are replaced by electronic mails. Newspapers were very used in the past but these are too replaced by television. Telephones and computers were also used in the past but these were replaced by smart phones. Many application were also introduced in smart phones which helped a lot in communication which each other. These days you can find your friend on Facebook, Instagram and talk to him with your convenience. So we can conclude that yes communication has become digital in the 21st century. Twenty-first century communication has changed how we connect to the world in three essential ways: connectivity, authenticity and style.

STUDENTS SPEAK FEBRUARY 2020:

Is technology a war weapon or a tool for peace?

STUDENTS SPEAK HAS COMMUNICATION BECOME DIGITAL?

Nikita Malik Class XI, Scholars Global School

The age in which we live has seen a massive proliferation in the way we perform our day to day activities. Advancement in technologies has even not left the communication sector untouched. Communication has become digital now. Face to face interactions have become infrequent. People offer to exchange their feelings electronically. One of the main reasons of this is that privacy which plays a key role is a plus point while communicating digitally. It can, therefore, be safely concluded that the evolving digital communications technologies have indeed transformed the way in which interpersonal communications are conducted and maintained, with even more surprises lying ahead.

Yajat Kohli, Vikas Bharati Public School

Recent technological advancements have a drastic impact on the way individuals communicate. Many research findings suggest that technology has a negative effect on both the quality and quantity of face-to-face communication. Despite individuals' awareness of the decrease of face-to-face communication as a result of technology, more than 62% of individuals observed on University campuses continue to use mobile devices in the presence of all... ..The capabilities associated with the modern mobile phones are being constantly enhanced and they are very likely to become mobile devices with multimedia capabilities that are able to replace mobile computers with a capability for exchanging voice, text, pictures and a lot of other content in the digital format.
