- **Educational news MASP  
Story - Green Field Sr. Sec.  
School, Nagrota Bagwan,  
Himachal Pradesh**
- **Events at Juana  
Technologies Pvt. Ltd.**
- **Gallery**

## INTRODUCING SEARCH COACH IN TEAMS

Search Coach is a simple, powerful, free app in Microsoft Teams that helps educators and students to form effective queries and identify reliable resources. Think of it as a search engine with training wheels. Search Coach teaches skills in a supported environment which can later be applied with any search engine.

While most search education focuses on analyzing results for reliability, the unique superpower of Search Coach is demonstrating how to form more effective search queries. To get the right answer, you first have to ask the right question! Students learn patterns that can help to avoid encountering most unreliable information in the first place. With support from educators in early testing and product design, Search Coach has incorporated student and educator feedback and is now expanding availability to all educators as a free Teams tab app in private preview.

## PROTECT YOUR ONEDRIVE FILES IN PERSONAL VAULT

Personal Vault is a protected area in OneDrive where you can store your most important or sensitive files and photos without sacrificing the convenience of anywhere access.

Personal Vault is set up with a strong authentication method or a second step of identity verification, such as fingerprint, face, PIN, or a code sent via email or SMS. Locked files in Personal Vault then have this extra layer of security, keeping them more secured if someone gains access to the account or device.

Personal Vault automatically locks after a period of inactivity and then you need to unlock it to get at your files again. All your documents, photos, and videos in Personal Vault are easy to access from onedrive.com, your PC, or other capable devices.

# TOP 3 SCHOOLS

(IN MICROSOFT 365 USAGE)

  
**New Schools**

1. Mount St. Mary's
2. Sanskriti School
3. Bal Bharati Public School, Gangaram

## SHOWCASE YOUR SCHOOL! *Video Competition*

Click the below link to know  
more

Build your own story – Your  
transformation journey |  
Juana Technologies Pvt Ltd

Showcase Your School  
BUILD YOUR OWN STORY  
YOUR TRANSFORMATION JOURNEY

This video competition will show how the school has transformed along and their areas of transformation. This will inspire other schools to follow this route. Along with this, the students creating the videos will get exposure to how the videos are created, their editing areas, and processes.

### *Our Success Story*

Green Field Sr. Sec. School is working from the past 26 years in the field of serving the nation by providing responsible citizens to the nation. Our digital vision has developed over the last few years and now 21CLD aligns with goals for redesigning curriculum with learning skills at the center, making effective use of data and sharing and building best practices.

Our 50 educators have become MIEE Expert by completing all the learning paths. Our 75 educators have already received MIE Certificate. The students in our school are using different tools of Microsoft such as Sway, One Note, Teams, Forms, Reading progress etc. in the learning process. This transformational journey has been a stepping stone in our success to continue with the teaching learning process.

Our students are participating in many activities and Challenges organized by Juana Technologies Gold partner Microsoft. In February 2022 in Monthly Challenge of Minecraft- Back to School, the students of our school received appreciation along with a trophy. A\*\*\*I and A\*\*\*i got first position and S\*\*\*\*n, U\*\*\*\*\*t and A\*\*\*\*\*r got first position in the National Level Competition. For the theme 'Molecular Structure' S\*\*\*\*\*i T\*\*\*\*r got first position in 'Benzene Structure' and D\*\*\*\*a M\*\*\*\*a got second position in 'Water Structure'. Our brilliant student D\*\*\*\*a M\*\*\*\*a also got first position in Edufiq- Leap Artificial Intelligence-2022 in which she presented her ideas to maintain good health in 21st century.

Another team of students 'Crazy World' worked to aware people about plastic waste and its hazards. The students of our school are time and again engaged in such competitions and events, where they are getting the platform and opportunities to learn more and execute their learning in real life situation. Minecraft Education is a game-based platform that inspires creative, inclusive learning through play. Explore blocky worlds that unlock new ways to take on any subject or challenge.

In addition to this our students are participating in each month challenge of Minecraft by securing positions and bringing laurels to the school. We are also participating in the Industry Engagement and Technology Exposure Feb-23 initiated by CBSE & Microsoft. With Microsoft it has been a wonderful journey to learn, initiate and grow not just in regional level but also on international level.
